Information about the Geisinger Health Plan Formulary

Purpose

The purpose of the Health Plan's¹ formulary is to optimize member care through the rational selection and use of medications, and to ensure quality, cost-effective prescribing. The formulary is developed with the input of practicing physicians and pharmacists. Medications in each therapeutic class have been reviewed for efficacy, safety, and cost. Maintenance of the formulary is a dynamic process; the Pharmacy and Therapeutics Committee continually review new medications as well as information related to medications currently included in the formulary.

Comments and suggestions on the formulary are welcome and should be directed to the Health Plan Pharmacy Department. Participating physicians may also access the Health Plan's Web site www.thehealthplan.com, to verify formulary medication status.

Traditional and Triple Choice prescription benefits

The Health Plan offers two prescription drug plans: the "traditional" benefit and the "Triple Choice" benefit. Exclusions may differ based on the benefit chosen and are delineated in the member's prescription drug rider. The same quantity limits apply to both benefits.

Traditional benefit

The traditional benefit includes coverage only for the prescription drugs listed in this formulary. Formulary exceptions may be granted on a case by case basis. Members with this benefit pay a set copayment or coinsurance for the approved drugs.

Triple Choice benefit

The Triple Choice benefit assigns each prescription drug to one of three different tiers, each representing a different copayment amount. Drugs not approved by the Pharmacy and Therapeutics Committee for inclusion in the formulary may be covered under Tier 3 copayment/coinsurance. The copayment/coinsurance amount will depend on the member's prescription drug rider. The tiers are defined below:

- **Tier 1**—Includes most generic drugs and has the lowest copayment/coinsurance. Prior authorization is usually not necessary.
- **Tier 2**—Includes certain formulary brand name drugs with no generic equivalent. Prior authorization may be necessary.
- **Tier 3**—Includes certain formulary brand name drugs with a generic equivalent and non-formulary brand name drugs*. Prior authorization may be necessary.

The Health Plan maintains sole discretion of assigning drugs to tiers and moving drugs from one tier to another. Several factors are considered when assigning drugs to tiers. These factors include, but are not limited to:

- availability of a generic equivalent
- absolute cost of a drug
- cost of the drug relative to other drugs in the same therapeutic class
- availability of over-the-counter alternatives
- clinical and economic factors

Please note: This formulary is accurate as of January 1, 2009 and is subject to change. A drug may change in tier status without notice due to immediate generic availability.

For Triple Choice benefit, see page 11 of this formulary for examples of medications not included on the formulary that may still be covered at the highest applicable copay level. These medications will **not be covered for members with the traditional prescription benefit.*

Specialty Vendor Drug Program

Certain medications require the use of a contracted specialty pharmacy vendor for purchase. Please contact the Pharmacy Service Team at (800) 988-4861 or visit thehealthplan.com for additional information on the program and a complete list of the medications included.

Formulary Compliance

Non-formulary medications: The formulary is designed to meet most therapeutic needs of the population served by the Health Plan. Occasionally, because of allergy, therapeutic failure, or a specific diagnostic-related need, formulary medications may not meet the special needs of an individual member. In these special instances, the prescribing physician may make requests to the Health Plan Pharmacy Department for non-formulary or restricted medications. The prescribing physician will receive written documentation and/or a verbal response from the Health Plan Pharmacy Department regarding the request. Under the Triple Choice plan, most non-formulary medications, not specifically excluded, do not require prior authorization and will be covered at the highest copayment/coinsurance level.

Formulary addition requests: Requests for changes or additions to the formulary can be made by written request to the Health Plan Pharmacy Department. Any additions or deletions to the formulary may be found in the publication "Briefly," which is issued quarterly to providers.

Formulary review process: Medications selected for inclusion in the formulary are chosen in consideration of effectiveness, safety and overall value. Evaluation for formulary inclusion is based on formalized selection criteria to determine the most optimal benefit to members. These criteria include but are not limited to:

- medication name/dosage form
- medication class/pharmacology
- FDA-approved indications
- adverse reactions
- clinical evidence of safety and efficacy
- recommendations of national agencies and organizations
- therapeutic equivalence
- cost analysis

The criteria are reviewed by the Health Plan Pharmacy and Therapeutics Committee, which is comprised of pharmacists and participating physicians in active clinical practice from various specialties. The medication is then reviewed and evaluated by clinicians in particular specialties for additional feedback. The feedback is discussed by the Pharmacy and Therapeutics Committee prior to finalizing a decision on formulary status. To be included, the medication must offer a distinct advantage over existing formulary medications in the same therapeutic class. Specifically, the medication must demonstrate such attributes as:

- a distinct or unique therapeutic feature
- greater efficacy, proven in clinical trials, over other medications in the same therapeutic category
- an improved dosing schedule, safety profile or cost-effectiveness over existing formulary medications

¹ Geisinger Health Plan, Geisinger Indemnity Insurance Company and Geisinger Quality Options, Inc. shall be collectively referred to as "Health Plan" in this Formulary booklet.

If there are comparable therapeutic agents, additional analysis may be considered. These factors include:

- member satisfaction
- cost analysis
- contract terms and conditions
- market share analysis
- patent life assessment
- utilization management
- consumer advertising
- per member per month costs
- impact on Health Plan population

Exclusions

Specific exclusions are noted below. Exclusions may vary depending on the member’s prescription plan.

- Over-the-counter (OTC) medications are not covered.
- Oral contraceptives and infertility medications, unless indicated by the subscriber’s contract as an additional benefit.
- Experimental, investigational, or unproven drug therapies.
- Lifestyle medications or medications used for cosmetic purposes.
- Medications for weight loss and weight management.
- Medications for erectile dysfunction.

Prior authorization: To promote the most appropriate utilization, select medications may require prior authorization by the Health Plan to be eligible for coverage under the member’s prescription benefit. Medications requiring prior authorization under the traditional benefit are designated in the formulary with an asterisk (*). Medications requiring prior authorization under the Triple Choice benefit are designated in the formulary with a (†) next to the medication name. The Pharmacy and Therapeutics Committee determines prior authorization criteria. In order for a member to receive coverage for a medication requiring prior authorization, the prescribing physician must obtain prior authorization by contacting the Health Plan Pharmacy Department at the address, telephone or fax number on page 1. Submission of medical documentation is required.

Quantity limits: There are quantity limits on some medications. These medications are designated in the formulary with two asterisks (**). Quantity limitations are the same for both the traditional and Triple Choice benefits. The following table lists medications with quantity limits currently in place. For additional information, please contact the Health Plan Pharmacy Department.

Drug name	Quantity limit

Sonata	15 capsules per copay/coinsurance
Tasigna	1 copay/coinsurance per 15 day supply
Tracleer	2 copays/coinsurances per 34 day supply

Twinject 1 kit per copay/coinsurance
 (Please note: A percentage copay applies for human growth hormone and is dependent upon the member’s prescription benefit.)

Generic substitution policy: The Health Plan prescription benefits are generically based. Generic substitution will occur for those medications included in the “Approved Drug Products with Therapeutic Equivalence Evaluations,” also known as “The Orange Book,” published by the U.S. Department of Health and Human Services. Generic medications, which have an equivalent rating by these standards, are generally provided under the member’s prescription drug benefit. The Health Plan may also elect to include only one brand-name medication in the formulary even if the medication is marketed by more than one company, or if the brand name medication does not significantly differ from the generic medication.

An index has been provided to assist in locating specific medications quickly. Medications not listed are not included on the formulary unless approved after the publication of this booklet and communicated in *Briefly* or an *Operations Bulletin*.

Under the the traditional benefit:
 When the generic equivalent appears in bold face type, coverage is for the generic version. When this occurs, medications in the “Brand Name” Column are not covered.

Under the Triple Choice benefit:
 the bolded generic equivalent will be covered at the tier 1 copay level and the corresponding brand name will be covered at the tier 3 copay level.

About the Geisinger Gold Formulary

This document includes partial formularies for

- Geisinger Gold Standard Rx and Gold Rx 1 Medicare Prescription Drug Plans
- Geisinger Gold \$0 Deductible Rx Medicare Prescription Drug Plan

This formulary is accurate as of January 1, 2010. For complete, updated formularies, please visit our Web site at www.thehealthplan.com, or call (800) 498-9731, seven days a week from 8 a.m. to 8 p.m.

A formulary is a list of covered drugs selected by in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. The Health Plan will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a participating pharmacy, and other plan rules are followed.

Can the formulary change?

Generally, if a member is taking a drug on our 2010 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2010 coverage year except when a new, less expensive generic drug becomes available or when new adverse information about the safety or effectiveness of a drug is released. Other types of formulary changes, such as removing a drug from our formulary, will not affect members who are currently taking the drug. It will remain available at the same cost-sharing for those members taking it for the remainder of the coverage year. We feel it is important that members have continued access for the remainder of the coverage year to the formulary drugs that were available when a member chose our plan, except for cases in which a member can save additional money or improve the safety of drugs.

If we remove drugs from our formulary, add prior authorization, quantity limits, step therapy restrictions on a drug and/or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 60 days before the change becomes effective, or at the time the member requests a refill of the drug, at which time the member will receive a 60-day supply of the drug. If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to members who take the drug.

There are two ways to find a drug within the formulary:

Medical Condition

The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category "Cardiovascular Agents."

Alphabetical Listing

Index that begins on page 63 provides an alphabetical list of all of the drugs included in this document. Both brand-name drugs and generic drugs are listed in the Index.

What are generic drugs?

Geisinger Health Plan Gold or Gold Rx covers both brand-name

drugs and generic drugs. A generic drug has the same active-ingredient as the brand name drug. Generic drugs usually cost less than brand name drugs and are approved by the Food and Drug Administration (FDA).

Restrictions on coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

Quantity Limits: There are quantity limits on some medications. These medications are designated in the formulary with an asterisk (*) in the quantity limit column. Please see page 9 of this introduction for a list of medications with quantity limits.

Prior Authorization: Prior authorization by the Health Plan may be required for certain drugs to be covered. Medications requiring prior authorization have two asterisks (**) in the prior authorization column.

Specialty Vendor Program: Certain drugs must be obtained through the Health Plan's Specialty Vendor Program. These medications are designated in the formulary with three asterisks (***) in the specialty vendor column. Please contact the Pharmacy Service Team at (800) 988-4861 or visit thehealthplan.com for additional information on the program.

Drug Tiers: Members can request non-preferred brand-name drugs on the 3rd tier to be covered at the 2nd tier copay. This will be approved if all formulary alternatives on the 2nd tier have been tried and failed.

You can find out if a drug has any additional requirements or limits by looking in the formulary that begins on page 10.

Members can ask for an exception to these restrictions or limits. See the section, "How to request an exception to the formulary?" on for information about how to request an exception.

What if a drug is not on the Formulary?

If a member's drug is not included in this formulary, the member should first contact the Customer Service Team and ask if the drug is covered. This document includes only a partial list of covered drugs, so the Health Plan may cover the drug.

If you learn that a drug is not covered, a member has two options:

A member can ask the Customer Service Team for a list of similar drugs that are covered by the Health Plan, show the list to his or her physician and ask him or her to prescribe a similar drug that is covered.

A member can ask the Health Plan to make an exception and cover the drug. See below for information about how to request an exception.

How to request an exception to the Formulary

A member can ask the Health Plan to make an exception to our coverage rules. There are several types of exceptions that a member can ask us to make.

A member can ask us to cover a drug even if it is not on our formulary.

A member can ask us to waive coverage restrictions or limits on a drug. For example, for certain drugs, the Health Plan limits the amount of the drug that we will cover. If a drug has a quantity limit, a member can ask us to waive the limit and cover more.

A member can ask us to provide a higher level of coverage for a drug. If a drug is contained in our non-preferred band name drug (3rd) tier, a member can ask us to cover it at the cost-sharing amount that applies to drugs in the preferred brand-name drug (2nd) tier instead. This would lower the amount the member must pay for the drug. Please note, if we grant a request to cover a drug that is not on our formulary, the member may not ask us to provide a higher level of coverage for the drug.

Generally, the Health Plan will only approve a request for an exception if the alternative drugs included on the plan's formulary, the lower-tiered drug or additional utilization restrictions would not be as effective in treating the condition and/or would cause adverse medical effects.

A member should contact us to ask us for an initial coverage decision for a formulary, tiering or utilization restriction exception. When a member is requesting a formulary, tiering or utilization restriction exception that member should submit a statement from his or her physician supporting the request. Generally, we must make our decision within 72 hours of getting the prescribing physician's supporting statement. The member can request an expedited (fast) exception if the member or the doctor believe that the member's health could be seriously harmed by waiting up to 72 hours for a decision. If the member's request to expedite is granted, we must make a decision no later than 24 hours after we get the prescribing physician's supporting statement.

Temporary supply

Under certain circumstances, the plan can offer a temporary supply of a drug when the drug is not on the Drug List or when it is restricted in some way. To be eligible for a temporary supply, members must meet the two requirements below:

1. The change to drug coverage must be one of the following types of changes:

- The drug is no longer on the plan's Drug List.
- -- or -- the drug is now restricted in some way.

2. Member must be in one of the situations described below:

- For those Members who were in the plan last year and aren't in a long-term care facility:

We will cover a temporary supply of the drug one time only during the first 90 days of the calendar year. This temporary supply will be for a maximum of a 30-day supply, or less if the prescription is written for fewer days. The prescription must be filled at a Network Pharmacy.

- For those Members who are new to the plan and aren't in a long-term care facility:

We will cover a temporary supply of the drug one time only during the first 90 days of membership in the plan. This temporary supply will be for a maximum of a 30-day supply, or less if the prescription is written for fewer days.

- For those who are new Members, and are residents in a long-term care facility:

We will cover a temporary supply of the drug during the first 90 days of membership in the plan. The first supply will be for a maximum of a 31-day supply, or less if the prescription is written for fewer days. If needed, we will cover additional refills during the first 90 days in the plan.

- For those who have been a Member of the plan for more than 90 days and are a resident of a long-term care facility and need a supply right away:

We will cover one 31-day supply, or less if the prescription is written for fewer days. This is in addition to the above long-term care transition supply.

How to Identify Geisinger Gold and Gold Rx Members

All members are issued identification cards specific to their plan and benefits with the name of the plan in the upper right-hand corner. If members have prescription drug coverage, they will also receive a prescription drug card similar to the one pictured here. For 2009, the prescription drug card will include a letter in the lower left-hand corner which identifies the formulary that is applicable for that member's prescription drug plan. You may see letters A through E:

Formulary A is for members with the Standard or Rx 1 drug coverage options

Formulary B is for members with the \$0 Deductible drug coverage option

Formulary D is for employer group members with a flat copay drug coverage plan

Formulary E is for employer group members with a triple tier drug coverage plan

This formulary booklet includes information on Formularies A and B. If you see a member with a "D" or "E" on their ID card, please consult our Web site at www.thehealthplan.com, or call the Health Plan's Pharmacy Department at (800) 988-4861 for information on medications covered under these enhanced plans.
